ENTERED AT SAN FRANCISCO, CAL. AS SECOND-CLASS MATTER

JUST ISSUED—NEW (2d) EDITION

Tousey's Electricity, X-rays, Radium

For this *new (2d) edition* Dr. Tousey has given his book a most severe revision. *New matter* to the extent of over *100 pages* has been added, and some *50 new illustrations*. All the newest advances are here recorded in Dr. Tousey's strikingly clear style. Of particular note are the new articles on diathermy, sinusoidal currents, radiography with intensifying screens, roentgenography, the Coolidge and similar roentgen tubes, Tousey's method of x-ray dosage, radium therapy, several of Machado's tabular classifications of electric methods, effects, and uses—every advance in medical electricity, x-ray and radium work, and phototherapy.

Dr. Tousey's book is as much for the general practitioner as for the specialist. In fact it is *particularly* the general practitioner's book. It tells you *how* to equip your office for this class of work, and it tells you just precisely how to *use* the apparatus, how to take care of it, how to get *results*. Everything is explained—nothing is omitted. It is complete in every detail—mechanical as well as therapeutic. It is the newest work on these subjects. It is complete.

Octavo of 1219 pages, with 801 illustrations, 19 in colors. By SINCLAIR TOUSEY, M.D., Consulting Surgeon to St. Bartholomew's Clinic, New York. Cloth, \$7.50 net; Half Morocco, \$9.00 net.
